

Listing of Claims:

1. (Currently amended) A building ~~Building~~ consisting of at least one building part in a form of a freight container having side walls, a ceiling and a floor, characterized ~~characterised~~ in that, in the interior, a floor panel (3) loosely lies on the floor (4), the floor panel ~~being which is several centimeters~~ em smaller on all sides than interior dimensions defined by the inner walls.
2. (Currently amended) A building ~~Building~~ according to claim 1, ~~which consists of at least one building part in form of a freight container having side walls, a ceiling and a floor,~~ characterized ~~characterised~~ in that, ~~in the interior a floor panel (3) loosely lies on the floor (4), which is several em smaller on all sides than the interior dimensions defined by the inner walls,~~ and that in the clearance between an inner wall and a surrounding outer wall ~~arranged~~ spaced therefrom, profiled parts (20, 21) vertically aligned and telescoping with each other in pairs are arranged at a with lateral distance from to each other, the end pieces (20, 21) of which are each attached at the outer ceiling wall on the top or at the outer floor wall at the bottom, respectively.
3. (Currently amended) A building ~~Building~~ according to claim 2, characterized ~~characterised~~ in that the profiled part attached at the floor extends as a hollow section part (21) across up to 1/4 of the distance between the ceiling and the floor and receives the profiled part (20) attached at the ceiling, which extends across about 9/10 of this distance.
4. (Currently amended) A building ~~Building~~ according to claim one of the claims 2 or 3,

characterized ~~characterised~~ in that the profiled parts (20, 21) are made of steel and are welded to the corresponding attachment points.

5. (Currently amended) A building Building according to claim ~~at least one of the claims 2 to 4~~, characterized ~~characterised~~ in that the profiled parts (20, 21) are formed circular or as a square section with cross-sectional dimensions in the range of several centimeters ~~centimetres~~.

6. (Currently amended) A building Wall and floor construction according to claim ~~at least one of the claims 2 to 5~~, characterized ~~characterised~~ in that the telescoping movement is attenuated by means increasing friction at ~~the~~ mutually engaging surfaces of the profiled parts (20, 21).

7. (Currently amended) A building Building according to claim ~~at least one of the claims 1 to 6~~, characterized ~~characterised~~ in that the floor panel (3) is formed with fasteners (2) for ~~the~~ transport.
